

CodeHarbor Technologies

Company Profile & Campus Hiring Brief

PlacementHub 2027 Campus Recruitment - Demo Document

Company Overview

A synthetic cloud tooling company focused on developer experience, observability, and secure deployment workflows.

Industry / type	Cloud and Developer Tools Private Limited
Head office / locations	Hyderabad, Telangana Hyderabad, Remote India
Founded / size	2019 51-200 employees
Website	https://codeharbor.example.com

What CodeHarbor Builds

Developer portals, deployment automation, and engineering observability tools.

- Developer portals and deployment automation that reduce friction in common engineering workflows.
- Engineering observability tools that connect operational signals with developer workflows and release behavior.

Engineering Environment

Core technologies	TypeScript, Node.js, Kubernetes, Docker, Redis
Primary role domains	Full-stack Engineering, Cloud Engineering
Hiring plan	Internship + full-time Online 6 expected campus hires
Recruitment window	January-February 2027
Joining / preferred location	June 2027 Hyderabad

2027 Campus Hiring Focus

CodeHarbor is looking for students who learn quickly, can debug unfamiliar code methodically, and are comfortable explaining how a software project moves from local development to a deployed environment.

- Target branches: CSE, Information Technology, and ECE. Highlighted drive: Cloud Engineering Intern - 3 hires with PPO consideration.
- Role base: Hyderabad; selected teams may support Remote India arrangements. Selection: Coding Test -> Engineering Interview -> Managerial Conversation.

Candidates should maintain a working GitHub/project link, demonstrate debugging discipline and practical cloud/deployment awareness, and follow official online scheduling through PlacementHub.
