

CodeHarbor Technologies

Recruitment Process & Candidate Instructions | Cloud Engineering Intern

PlacementHub 2027 Campus Recruitment - Demo Document

Drive Summary

Company	CodeHarbor Technologies
Role	Cloud Engineering Intern
Application deadline	18 January 2027
Expected hires	3
Recruitment mode	Online
Role base	Hyderabad
Stipend	INR 45,000 per month
Internship start	June 2027
PPO review	December 2027

Recruitment Stages

Round	Stage	Format	What is assessed
1	Coding Test	Online	Problem solving and practical JavaScript.
2	Engineering Interview	Online interview	Projects, debugging approach, Git workflow, and cloud fundamentals.
3	Managerial Conversation	Online conversation	Learning goals, collaboration style, internship expectations, and availability.

Remote Coding Test Setup

- Use a laptop/desktop with a stable internet connection and a modern browser.
- Keep your verified PlacementHub email/phone accessible for assessment communication.
- Have a valid college or government-issued photo ID available if identity verification is requested.
- Close unrelated applications and avoid external assistance unless the assessment explicitly permits it.
- Do not distribute test content, links, credentials, screenshots, or solution material.

Engineering Interview Preparation

- Be ready to walk through one software project with emphasis on architecture, debugging, Git usage, and what you personally built.
- Review JavaScript fundamentals, Node.js basics, asynchronous behavior, APIs, Git, Linux basics, and introductory cloud/deployment concepts.
- Preferred-tool exposure such as TypeScript, Docker, Linux, or React is useful, but clear fundamentals matter more than keyword count.
- Expect practical questions about diagnosing failure, reading logs, reproducing a bug, and communicating uncertainty.

Document & Profile Checklist

- Current one-page resume uploaded to PlacementHub.
- Accurate academic profile showing 2027 graduation year, eligible branch, CGPA at or above 7.2, and zero active backlogs.
- Working GitHub link or a prepared, clear explanation of a software project.
- Photo ID available for verification if requested.

Result Communication & PPO Path

Recruitment round status is communicated through PlacementHub. Selected candidates enter the six-month internship beginning in June 2027. PPO review is expected in December 2027; internship selection itself does not guarantee conversion to a full-time offer.

Important Policy Notes

- No service bond is attached to the internship pathway.
- Candidates should disclose availability constraints before accepting a scheduled interview.
- Material discrepancies between profile information and verification documents may lead to candidature review.
