### What ForgeLine Delivers

Industrial project execution, manufacturing engineering, and reliability improvement services.

- Manufacturing improvement work spans process capability, work instructions, quality analysis, equipment/fixture support, and reliability improvement.
- Industrial project work spans drawings, schedule/quantity inputs, field reporting, safety documentation, and multi-discipline site coordination.

### Engineering Environment

|                      |                                                                        |
|----------------------|------------------------------------------------------------------------|
| Core technologies    | SolidWorks, AutoCAD, Process Simulation, Quality Tools, Safety Systems |
| Primary role domains | Manufacturing Engineering, Industrial Project Engineering              |
| Hiring plan          | Internship + full-time mix   Hybrid   about 10 expected campus hires   |
| Recruitment window   | April 2027                                                             |
| Preferred locations  | Pune, Nagpur, Raipur                                                   |

### 2027 Campus Hiring Focus

ForgeLine has two role tracks in the 2027 demo hiring plan. Candidates should apply to the track that best matches their branch, interests, and readiness for plant/site-oriented engineering work.

- Manufacturing Engineer Trainee - Pune - Mechanical, Chemical, and Metallurgical & Materials Engineering.
- Industrial Project Engineer - Nagpur - Civil, Mining, Chemical, and Metallurgical & Materials Engineering.

Across both tracks, the company values engineering fundamentals, drawing/data discipline, practical problem solving, safety awareness, documentation quality, and willingness to work with plant or project-site teams.
