

ForgeLine Industrial Engineering

Job Description | 2027 Graduate Engineering Roles

PlacementHub 2027 Campus Recruitment - Demo Document

Role Portfolio

ForgeLine is running two separate 2027 placement drives. Each has its own branch eligibility, work location, compensation, and selection path. Students should apply only to roles for which they meet the published eligibility criteria.

Role A - Manufacturing Engineer Trainee

Employment type	Full-time
Work mode / location	Hybrid Pune
Expected hires	5
CTC	INR 6.8 LPA
Application deadline	1 March 2027
Joining	August 2027
Service bond	No service bond
Support process capability studies, work-instruction improvements, quality analysis, and plant-floor engineering projects.	
• Collect and structure process/quality observations for engineering review. • Support work-instruction, tooling, layout, and process-improvement activities. • Participate in root-cause/problem-solving discussions and document corrective actions. • Use drawings, quality tools, and basic analysis to support repeatable manufacturing decisions.	
Required skills	Manufacturing; Engineering Drawing; Problem Solving; Quality Tools
Preferred skills	SolidWorks; ANSYS; Process Simulation; Python
Eligible branches	Mechanical; Chemical; Metallurgical and Materials Engineering
Minimum CGPA / backlogs	7.0 / Maximum 0
Additional requirement	Interest in plant operations and continuous improvement

Role A Selection

Round	Stage	Format	What is assessed
1	Core Aptitude Test	Assessment	Engineering aptitude, drawing interpretation, and quality reasoning.
2	Technical Interview	Interview	Core fundamentals and project discussion.
3	Plant-readiness Conversation	Practical discussion	Shift, location, and practical problem-solving readiness.
4	HR Interview	HR discussion	Offer expectations and joining conversation.

Role B - Industrial Project Engineer

Employment type	Full-time
Work mode / location	Hybrid Nagpur
Expected hires	4
CTC	INR 6.5 LPA
Application deadline	8 March 2027
Joining	August 2027
Service bond	No service bond

Coordinate drawings, quantity and schedule inputs, safety documentation, and field-reporting workflows for industrial projects.

- Support drawing/document control and coordination of technical inputs across project teams.
- Maintain schedule, quantity, progress, and field-reporting inputs in structured formats.
- Assist with safety documentation, issue tracking, and site communication.
- Use spreadsheets and planning/drawing tools to keep project information reviewable and traceable.

Required skills	AutoCAD; Project Planning; Excel; Safety Management
Preferred skills	GIS; Construction Planning; Process Simulation; Data Analysis
Eligible branches	Civil; Mining; Chemical; Metallurgical and Materials Engineering
Minimum CGPA / backlogs	7.0 / Maximum 0
Additional requirement	Comfort with site coordination and clear written reporting

Role B Selection

Round	Stage	Format	What is assessed
1	Project Planning Exercise	Assessment	Schedule interpretation, safety prioritisation, and spreadsheet reasoning.
2	Core Technical Interview	Interview	Project fundamentals, drawings, and candidate project detail.
3	HR Discussion	HR discussion	Location readiness and professional communication.

Common Expectations

- Graduation year: 2027; zero active backlogs.
- Candidates should be realistic about plant/site work, mobility, and professional safety expectations.
- Resume/project claims should be explainable with specific personal contribution.
