

ForgeLine Industrial Engineering

Recruitment Process & Candidate Instructions | 2027 Graduate Engineering Roles

PlacementHub 2027 Campus Recruitment - Demo Document

Drive Summary

Company	ForgeLine Industrial Engineering
Role tracks	Manufacturing Engineer Trainee Industrial Project Engineer
Locations	Pune Nagpur
CTC	INR 6.8 LPA INR 6.5 LPA
Deadlines	1 March 2027 8 March 2027
Joining	August 2027
Service bond	No service bond for either role

Choose the Correct Role Track

- Manufacturing Engineer Trainee: Mechanical, Chemical, Metallurgical and Materials Engineering; Pune; minimum 7.0 CGPA; zero active backlogs.
- Industrial Project Engineer: Civil, Mining, Chemical, Metallurgical and Materials Engineering; Nagpur; minimum 7.0 CGPA; zero active backlogs.
- Chemical and Metallurgical/Materials students may be eligible for both tracks; apply based on role interest and the active drive rules shown in PlacementHub.

Common Candidate Preparation

- Keep PlacementHub profile, resume, branch, CGPA, backlog status, and contact details accurate.
- Prepare one core engineering project in depth, including your own contribution, drawings/data used, problem faced, and validation/result.
- Carry/keep available valid identification and requested academic documents for campus verification.
- Review basic engineering safety, professional communication, and practical problem-solving approaches.

Track A - Manufacturing Engineer Trainee

Round	Stage	Format	What is assessed
1	Core Aptitude Test	Assessment	Engineering aptitude, drawing interpretation, manufacturing/quality reasoning.
2	Technical Interview	Interview	Core fundamentals, project detail, manufacturing thinking, and problem solving.
3	Plant-readiness Conversation	Discussion	Shift/location readiness, practical judgement, and plant-work expectations.
4	HR Interview	HR discussion	Offer expectations, joining plans, and communication.

Preparation Focus

- Engineering drawing interpretation, manufacturing processes, basic quality tools, root-cause thinking, and project fundamentals.
- Preferred exposure such as SolidWorks, ANSYS, process simulation, or Python should be explained through actual use.
- Be prepared to discuss shop-floor discipline, documentation, and continuous-improvement examples.

Track B - Industrial Project Engineer

Round	Stage	Format	What is assessed
1	Project Planning Exercise	Assessment	Schedule interpretation, safety prioritisation, spreadsheet reasoning, and field-reporting logic.
2	Core Technical Interview	Interview	Project fundamentals, drawings, planning, candidate project detail, and site judgement.
3	HR Discussion	HR discussion	Location/site readiness and professional communication.

Preparation Focus

- AutoCAD/drawing familiarity, Excel, project-planning basics, quantity/schedule interpretation, safety priorities, and written reporting.
- Be ready to explain how you would communicate a site issue, update progress records, and escalate a safety or schedule risk.
- Preferred GIS, construction planning, process simulation, or data-analysis exposure should be presented honestly at the level used.

Result Communication & Policy Notes

Each role is tracked as a separate PlacementHub drive. Round progression, shortlisting, and final selection should be read from the corresponding official drive status. Selection in one ForgeLine drive does not automatically imply selection in the other.

- No service bond is attached to either role.
- Candidates must comply with the branch-specific eligibility of the role they apply for.
- Material discrepancies between profile information and verification documents may lead to candidature review.
