Founded / size	2014 201-500 employees
Website	https://insightforge.example.com

What InsightForge Delivers

Decision dashboards, demand analytics, and data quality programmes.

- Analytics engagements that convert operational questions into traceable data preparation, analysis, dashboards, and recommendations.
- Teams emphasize reproducible SQL, spreadsheet discipline, clear assumptions, data-quality checks, visualization clarity, and concise stakeholder communication.

Analytics Environment

Core technologies	Python, SQL, Power BI, Excel, Statistics
Primary role domains	Data Analytics, Business Intelligence
Hiring plan	Full-time placement Hybrid 5 expected campus hires
Recruitment window	March 2027
Joining / preferred locations	August 2027 Gurugram, Bengaluru

2027 Campus Hiring Focus

InsightForge is hiring graduates who can reason with data, explain assumptions, and communicate findings clearly. The campus process is intentionally open across engineering branches because strong analytical thinking can come from software, electronics, life-sciences, and core-engineering backgrounds.

- Highlighted drive: Data Analyst - 5 hires, Gurugram, hybrid, with exposure to consulting-style analytics work.
- Selection: Aptitude and Case Exercise -> Analytics Interview -> HR Discussion.

Candidates should be prepared to discuss one data, analysis, dashboard, or research project with enough detail to explain the question, data source, checks performed, analysis method, and final conclusion.
