

InsightForge Analytics

Recruitment Process & Candidate Instructions | Data Analyst

PlacementHub 2027 Campus Recruitment - Demo Document

Drive Summary

Company	InsightForge Analytics
Role	Data Analyst
Application deadline	8 February 2027
Expected hires	5
Work location	Gurugram
Work mode	Hybrid
CTC	INR 8.5 LPA
Joining	August 2027

Recruitment Stages

Round	Stage	Format	What is assessed
1	Aptitude & Case Exercise	Assessment	Numerical reasoning, spreadsheet interpretation, data-reading, and a short business case.
2	Analytics Interview	Interview	SQL logic, analytical framing, data-quality checks, dashboard reasoning, and project discussion.
3	HR Discussion	Conversation	Communication, consulting expectations, location readiness, and joining plans.

Case Exercise Preparation

- Read the question carefully and identify the decision or metric being asked for before calculating.
- Show intermediate assumptions and checks rather than presenting only a final number.
- Review percentages, ratios, averages, trend interpretation, basic statistics, and spreadsheet-style data reasoning.
- A basic non-programmable calculator may be used only when explicitly permitted in the assessment instructions.
- Do not share case material, screenshots, links, credentials, or solution content with other candidates.

Analytics Interview Preparation

- Prepare one data, analysis, dashboard, or research project end-to-end: question, data source, cleaning, validation, analysis, visualization, result, and limitation.
- Review SQL filtering, joins, grouping, aggregation, null handling, and common data-quality checks.
- Review Excel formulas, pivots/lookups, chart selection, and how to communicate a concise insight.
- For Python/Power BI exposure, be ready to explain what you actually used and why; depth matters more than keyword count.

Document & Profile Checklist

- Current resume and verified PlacementHub academic profile.
- 2027 graduation year, minimum 7.3 CGPA, zero active backlogs.
- Working project/research links when listed on the resume.
- Valid photo ID available if requested during assessment or interview verification.

Result Communication & Candidate Status

Round progression and final status will be communicated through the PlacementHub recruitment pipeline. A strong case exercise does not itself constitute a job offer; only the final company/placement workflow status should be treated as official.

Important Policy Notes

- No service bond is attached to the Data Analyst role.
- All engineering branches configured in the 2027 demo dataset are eligible, subject to the academic/backlog criteria.
- Material discrepancies between profile data and verification documents may lead to candidature review.
