Founded / size	2016 201-500 employees
Website	https://nexora.example.com

What Nexora Builds

Workflow automation, identity-aware SaaS platforms, and API integration products.

- Workflow and cloud-platform products that connect operational teams, approvals, business data, and reliable APIs.
- Engineering practices emphasize observability, maintainability, secure access, code review, reproducible debugging, and production readiness.

Engineering Environment

Core technologies	Java, Spring Boot, React, PostgreSQL, AWS
Primary role domains	Backend Engineering, Platform Engineering
Hiring plan	Internship + full-time Hybrid 8 expected campus hires
Recruitment window	February-March 2027
Joining / preferred locations	July 2027 Bengaluru, Pune

2027 Campus Hiring Focus

For the 2027 graduating batch, Nexora is using PlacementHub to hire students who can explain fundamentals clearly, demonstrate ownership of at least one substantial project, and work carefully with APIs, data, debugging, and version-controlled engineering workflows.

- Target branches: CSE, Information Technology, and ECE. Highlighted drive: Backend Engineer - 4 hires, Bengaluru, hybrid.
- Selection: Online Assessment -> Technical Interview I -> Technical Interview II -> People Conversation.

Applicants should keep resume/project links current, be ready to explain personal project contribution and debugging choices, and ensure academic eligibility is verified in PlacementHub.
