Industry / type	Power Systems and Industrial Automation Private Limited
Head office / locations	Vadodara, Gujarat Vadodara, Chennai, Pune
Founded / size	2008 501-1000 employees
Website	https://voltage.example.com

What VoltEdge Builds & Supports

Power quality equipment, industrial controls, and commissioning services.

- Engineering work spans industrial power-quality systems, electrical design support, controls, testing, commissioning, and field troubleshooting.
- Safety, drawings, disciplined measurement, traceable test records, and clear site communication are treated as core engineering practices.

Engineering Environment

Core technologies	Power Systems, PLC, SCADA, MATLAB, AutoCAD Electrical
Primary role domains	Electrical Design, Embedded Controls
Hiring plan	Full-time placement Offline 7 expected campus hires
Recruitment window	February 2027
Joining / preferred locations	July 2027 Vadodara, Chennai

2027 Campus Hiring Focus

VoltEdge is hiring Electrical/ECE graduates who are strong on fundamentals and willing to learn through design-office, test-bay, and project-site exposure. Candidates should be comfortable discussing laboratory/project work and applying safe engineering judgement.

- Highlighted drive: Graduate Electrical Engineer - 4 hires, Vadodara, offline campus process.
- Selection: Core Technical Test -> Technical Interview -> HR Interview.

The role includes post-training travel to project sites, so candidates should consider site-readiness, safety expectations, and location flexibility before applying.
