

VoltEdge Power Systems

Job Description | Graduate Electrical Engineer

PlacementHub 2027 Campus Recruitment - Demo Document

Role Snapshot

Role	Graduate Electrical Engineer
Employment type	Full-time
Domain	Power Systems
Recruitment mode	Offline
Work location	Vadodara
Expected hires	4
CTC	INR 7.2 LPA
Application deadline	14 February 2027
Joining	July 2027
Service commitment	18 months; proportional training-cost recovery

Role Purpose

Assist design, testing, and commissioning teams for industrial power-quality and automation installations. Graduate engineers rotate through structured technical work under supervision before taking independent responsibility for defined design, testing, documentation, or site tasks.

Key Responsibilities

- Support preparation and review of electrical drawings, equipment schedules, and test documentation.
- Assist with power-system calculations, equipment selection inputs, and engineering checks under supervision.
- Participate in panel/control-system testing, basic PLC/SCADA exposure, and commissioning preparation.
- Record measurements, test observations, defects, and corrective-action status accurately.
- Follow electrical safety procedures, lockout/tagout expectations, PPE requirements, and site rules.
- Coordinate with design, manufacturing, service, and site teams using clear written and verbal updates.
- Travel to project sites after training when assigned and support supervised commissioning activities.

Skills

Required	Power Systems; Electrical Machines; Circuit Analysis; Safety Fundamentals
Preferred	PLC; SCADA; MATLAB; AutoCAD Electrical

Eligibility

Minimum CGPA	7.0 / 10
Eligible branches	Electrical Engineering; Electronics and Communication Engineering
Active backlogs	Maximum 0
Graduation year	2027
Additional requirement	Willingness to travel to project sites after training

Selection Process

Round	Stage	Format	What is assessed
1	Core Technical Test	Offline assessment	Electrical fundamentals, machines, circuit analysis, and basic control concepts.
2	Technical Interview	Technical interview	Core concepts, lab/project discussion, troubleshooting, and safety judgement.
3	HR Interview	HR discussion	Site readiness, communication, service commitment, and joining expectations.

Role Conditions to Understand Before Applying

- Primary joining location is Vadodara; project assignments may require travel after training.
- The role includes an 18-month service commitment with proportional recovery of defined training cost if the commitment terms are not completed.
- Candidates should read the formal offer/commitment terms carefully before acceptance; this campus brief is not the employment contract.
